Related Experience

Eleven Fifty Academy .Net Apprentice

October 2017-Present

Learning Full Stack development in an intensive project based program. I'm currently creating a portfolio that contains a variety of websites and applications that range from static websites to fully functional web applications that exceed industry standards. Projects have been created independently and as a group with peers in my cohort.

Technologies Include:

HTML 5 / CSS 3 / C# / JavaScript / .Net Framework / Bootstrap / Version Control

- Created 3 JavaScript applications
- Used HTML\CSS to create 2 professional websites from scratch
- Programmed a C# console application in Visual Studio
- Created a "Restaurant Rating" application in Visual Studio
- Competent in version control (GitHub)
- Used Bootstrap to create robust and functional websites
- Debugged 15+ websites independently and with peers
-

Treehouse Online Learning Active Student

November 2016-January 2017

- Independently learned HTML, CSS, and JavaScript through online videos and practice problems.
- Improved upon pre-coded websites to improve visuals and usability.
- Created websites using a mobile first approach with media queries.
- Experience in using responsive web design best practices.
- Developed web applications using JavaScript and JQuery.
- Earned 56+ badges representing different skills I have developed.
- Regularly practice debugging different types of code.
- Learned how to plan a complex coding project to effectively execute.

andrewsieg.com
Site Creator and Owner

February 2016-September 2016

- Conducted in-depth research to find the most suitable platform to build the site.
- Utilized WordPress and a hosting service to construct the site.
- Customized the site using HTML, web applications, and images.
- Optimized the site for search engines such as Google.
- Used best practices to make the site visually appealing and readable.
- Implemented an email subscription platform to connect with visitors.
- Created an eBook and made the book available as a download.
- Promoted the eBook via social media to a niche audience.
- Used e-commerce software to sell the eBook via andrewsieg.com.

Changsha Number One High School - China
Technology Instructor

August 2015-May 2016

- Taught PowerPoint, MS Word, and MS Excel to 100+ students.
- Taught both beginner and advanced functions in all three programs.
- Independently created the semester syllabus 12 weeks in advance.
- Regularly communicated with management to adjust goals as needed.
- Tested students and reviewed problem areas as needed.
- Used a variety of methods to communicate with high and low level English Speakers.
- Adjusted working style to fit the Chinese culture.
- Participated in extra curricular activities to build relationships with students and management.
- Independently created supplemental study materials to further motivate and enhance students' learning experience.
- Stayed after class as requested to assist students with academic or personal issues.

Honors & Awards

- Eagle Scout – For my project, I organized a festival for my town's bicentennial that attracted over 350 people and managed the efforts of over 100 people.
- Theatre Achievement Scholarship – Educational scholarship awarded to an actor who has given outstanding contributions to high school theatre.
- Sigma Pi Fraternity Founding Father- I founded a fraternity at the University of Louisville which is dedicated to building value driven collegiate men.
